

Please do not relax the rules concerning the cross ownership of newspapers, tv, and other media within our news markets. The current media coverage of news is already woefully lacking in variety and viewpoint. The proposal to allow even more cross ownership than what is current will not have any beneficial effect for the public. Unfortunately, it will have a beneficial effect for the corporate entities which already dominate media coverage of the news. The proposal makes the FCC look (and would make it act) like the spineless tool of corporate interests. You must act in the public interest, which is definitely not the same.
